

*Friction Materials & Phenolic Bearings*

# Oilfield Brake Bands

October 31, 2014

Dear Distributor,

Scan-Pac is happy to announce that we are now offering **Oilfield Brake Bands** with our quality A-Block and Gemini Oilfield brake blocks attached. This new offering will allow customers to order completely assembled bands from Scan-Pac, rather than ordering blocks and bands separately. As a result, Scan-Pac is now a one stop shop for any of your Oilfield Brake Band needs.

We offer bands for any well servicing or drilling rig manufacturers listed in our Oilfield products catalog. If you have any questions about our brake band or block product offerings, please don't hesitate to contact one of our customer service or sales experts. Scan-Pac's commitment to offering high quality products is evident for brake bands as well, since our bands are manufactured with high strength alloy steel. The end result is OEM quality bands that are sold at competitive prices coupled with fast turnaround times.

In addition to supplying new, we'll also refurbish used bands with certificate of conformance to guarantee our quality standards. **Request a quote today!**

Scan-Pac Mfg. is a manufacturer of non-asbestos friction materials and phenolic laminates for use in a wide range of industrial and oilfield applications. The company has three manufacturing locations that include two facilities located in Menomonee Falls, Wisconsin and one in Magnolia, Texas. Scan-Pac employs 140 people and has proudly been in business for over 40 years.

Thank you for your business and continued support.

Regards,

Jeff Lichey
