

Product Data Sheet: RF 14

GENERAL DESCRIPTION

RF14 is a rigid molded *Non-Asbestos* friction material suitable for use in *Low Friction* brake/clutch applications such as in tensioning devices. RF 14 is smooth, extremely easy on the mating surfaces and keeps the interface temperatures down. RF 14 can be molded into many intricate internal, external, and customer specified shapes.

FEATURES

- Exceptional dimensional stability
- Extremely low noise operation
- Excellent corrosion resistance
- Non-Abrasive
- Excellent wear rate.

SAE J661A TEST CURVES

*Note 1. – Friction values shown are for guide purposes only since values deviate with changes in temperature, pressure and speed. Practical design should include a 25 to 50 percent safety factor.

**Note 2. – Rubbing speed, drum temperature, and pressure are directly related. Changing any one value will change the others. The values shown represent typical conditions, but are not the ultimate limits of the material.
