

## Scan-Pac Launches Redesigned Website

August 31, 2016

Dear Customer,

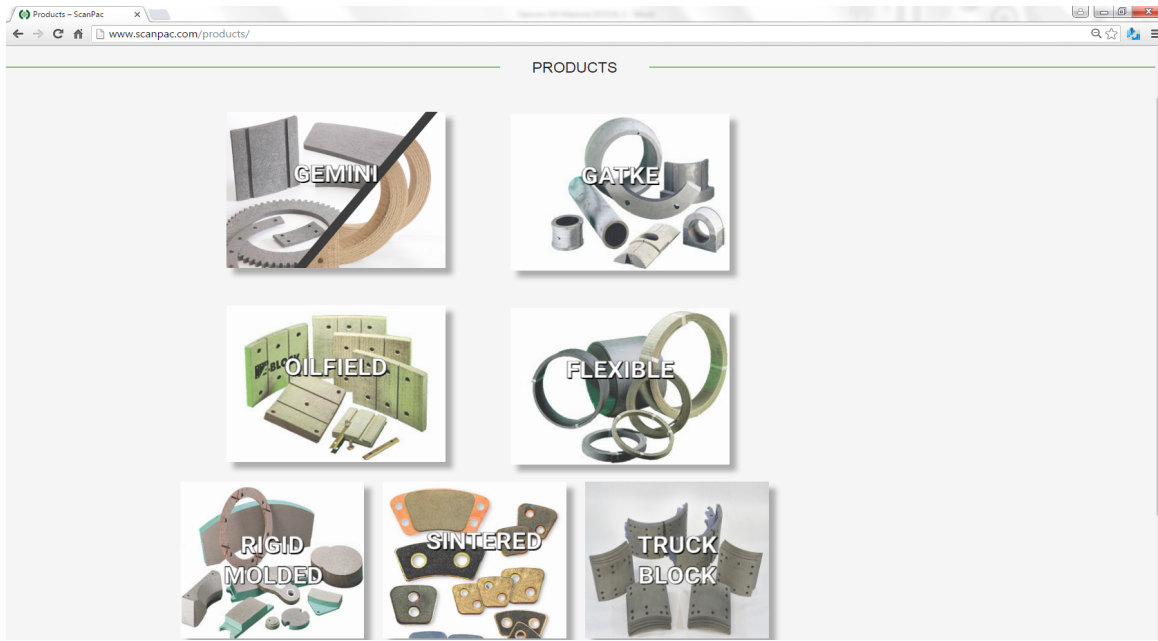

Scan-Pac is pleased to announce the release of our newly designed website featuring an updated markets section, friction material offerings, catalogs in PDF format, and printable technical data sheets and Safety Data Sheets. In addition, our Material Recommendation section will guide the user through the material selection process. First, the customer will select one of five different brake or clutch categories. The site then lists common applications associated with that particular brake or clutch category as well as Scan-Pac's material options and data sheets.

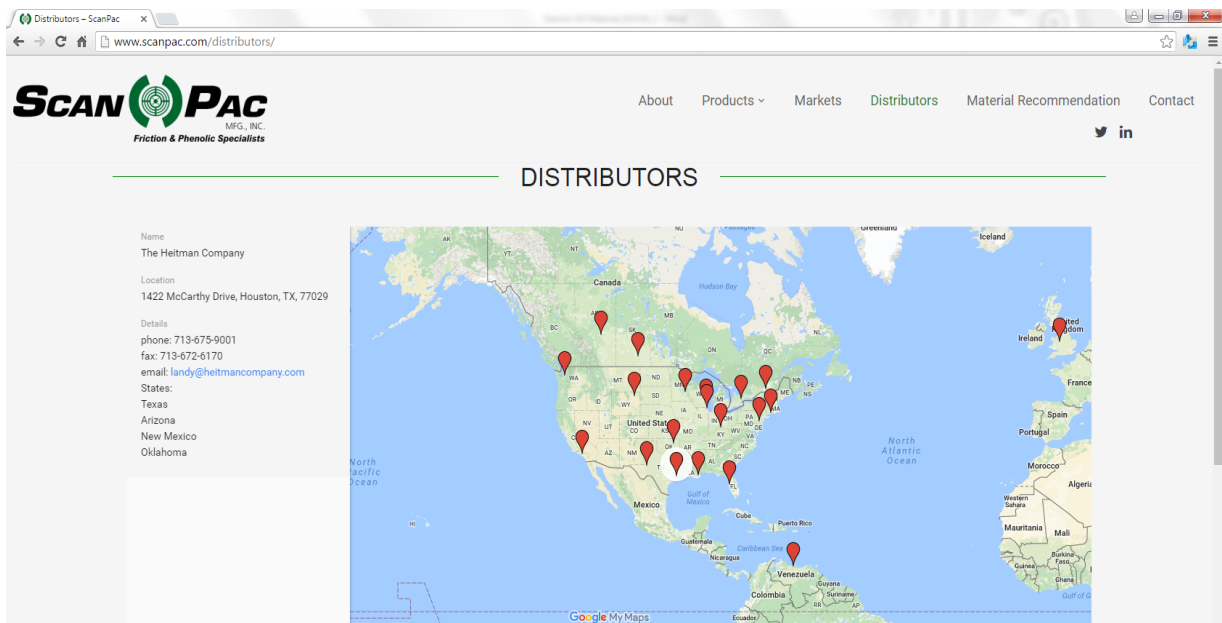

Each one of the 7 product categories listed below contains an overview of the products we offer along with pictures, Technical Data Sheets, and Safety Data Sheets. If you have a unique

application that requires a custom formulation, our R&D experts can work to develop one that is specific to the needs of your application.

In addition, Scan-Pac's new site contains a distributor world map with contact information that will enable customers to choose the correct distributor for their geographic location. Our distributors are well versed in Scan-Pac's product offerings. They will guide you to the correct material for your application and work with us to provide delivery in a timely manner.

Scan-Pac Mfg. is a manufacturer of non-asbestos friction materials and phenolic laminates for use in a wide range of industrial and oilfield applications. The company has three manufacturing locations that include two facilities in Menomonee Falls, Wisconsin and one in Magnolia, Texas. Scan-Pac employs 100 individuals and has proudly been in business for more than 40 years.

Download our Scan-Pac App using the links below or find it on the App Store or Google Play.

Thanks and best regards,

Jeff Lichey  
VP, Sales & Marketing
